**FOOD DONATION SYSTEM**

**Supervisor**  
**Mam Ayshea Hussain**

**USAMA REHMAN**  
**RANA EATISAM AHMAD**

# REAL-WORLD ISSUE WE TARGETED

Our product originated from the existing system 'actions against hunger'. Our product provides more functionalities than the existing system. The existing system does not focus on food donations and is more focused on monetary donations which our system does support but in addition to that provides more features and, in this way, the customer has more options for donations.

# PROJECT DESCRIPTION

- To collect food from various sources.
- Sending food to the ones in need through volunteers.
- Making sure that the food reaches the desired person.
- Other objectives include sending cooked food (Daigs etc.) to the needy after collecting money from the people and sending monthly packages (Raashan).
- To provide the user a platform for the users to participate in various drives. (Ramadan, Qurbani)
